

Technical drawing of a circular plate. The drawing shows three concentric circles. The outermost circle is labeled '1' and 'placa' (plate). Inside it are two more concentric circles. Eight radial lines, represented by dashed lines, extend from the center to the outer edge, dividing the plate into eight equal sectors. At the intersection of each radial line and the middle concentric circle, there is a small circle. A dashed rectangle is shown at the bottom center, with an arrow pointing to it from the bottom right.
